Hi Rob,

Thanks for recording our sessions with Christopher Plummer, who was playing Charles Muntz in the Pixar film 'Up'.

I was the first to arrive on the first day and you and your crew were very helpful with our technical set up. We were ready to roll by the time Mr. Plummer arrived.

He drew upon his extensive background for his performances. The set-up was also challenging, as the Director, Pete Docter, was giving his direction via tie line from back at Pixar. You were very patient and maintained focus to deliver clean primary mic audio. You also were very careful and patient to check all the in and out points so my records matched yours.

We did manage to get some wonderful performances from him which we used in the final cut.

You were quick, responsive and delivered a fine end product from a rather challenging session.

all the best,

Amera
